1. A field work in the British Library of Political and Economic Science

The British Library of Political and Economic Science is the working library of the London School of Economics [L.S.E.] in the University of London, and the same time serves as a national collection of material for research since its foundation in 1896.

Its scope is the social sciences in the widest sense of the term, and it is one of the largest libraries in the world devoted exclusively to this range of subjects. The Main Library contains over 790,000 bound volumes, including over 500,000 pamphlets, over 25,000 serials (of which over 13,000 are received currently), and numerous special collections of manuscripts and rarities: the total number of separate items is estimated at some 3 million.⁽¹⁾

The Library also is known as the library which collects books and other materials on David Ricardo. In addition, he lived, worked, studied and researched in London where the Library is located. The Library is now a place of pilgrimage for students and economists researching on David Ricardo.

The Library, generally speaking, tries hard to make it easier for its readers to find their way round such a large collection. For instance, it has staff who answer readers' enquiries, and issues a series of leaflets which explain in detail both the use, and some of the resources, of the Library, and which may be obtained from the Reference Desk.

It, nevertheless, is not always easy for new readers or beginners to attain their full objects. The following are reasons:

- (1) Although the Library provides the subject catalogue and the periodicals catalogue, the author/title catalogue is the main guide to research on some particular subject. Accordingly, if new readers or beginners do not know the author's names or the titles of volumes, it is not easy for them to find what they need.
- (2) The Library shows bibliography of some authors or some subjects in the general card catalogue (pre-1980), the microfiche catalogue (post 1979), and even in the classified sequence catalogue or the computerized subject catalogue. But their volumes are not enough for the special research in greater depth.

So far as the research on David Ricardo is concerned, Keitaro Amano compiled "David Ricardo bibliography" of wider scope in 1962.⁽²⁾ But he

did not tell where each item in his catalogue could be found.

For the convenience of Japanese readers who are going to research on David Ricardo in the Library, I would like to show them here what bound volumes, except pamphlets and periodicals, are available on him in the Library at present. Considering various circumstances, however, I show only bound books here, which are written in popular languages for Japanese readers.

By the way, a faithful list of texts and papers known to have belonged to the library of Adam Smith was given by James Bonar in 1894 and 1932.⁽³⁾ Later, Hiroshi Mizuta brought out a supplement to Bonar's catalogue, and completed a check-list of Adam Smith's library, including both the books recorded by Bonar and all those listed in the supplement, in 1967.⁽⁴⁾

In the case of David Ricardo, I believe he also had many texts and papers. But I regret to say that a list of those known to have belonged to him has not been found, accordingly, such a catalogue of the library of David Ricardo as Adam Smith has not been published up to the present.

(Dec. 1, 1988).

2. A Supplement

The Library introduced fully computerized real time catalogue in August 1988.

This enables the reader to search for authors, titles, or for words included in the title, as well as for subject headings.

Thus, by using the "subject keyword search" and searching for "Ricardo", one can find every book catalogued since 1980 which is by Ricardo or about Ricardo. As it also brings up every author whose last name is Ricardo, the reader only needs to select David Ricardo out of them.

At present, this facility only applies to the material on the microfiche catalogue, which already existed in machine readable form, but the Library will try to extend it to the card index catalogue which contains almost all the other books.

(Dec. 21, 1988).
